Beds utilize a unique design to ship, store,
or transport vertically

- County Facility Realizes Low Cost of Ownership with Med-Mizer -

An Eastern PA county owned facility has made the Med-Mizer RetractaBed it's primary replacement bed. With over 150 beds implemented over the past 4+ years, the embedded dual controls, hi-low functionality, and unique vertical transport and storage have been well received. Med-Mizer safety and durability have made this their replacement bed of choice.
