RE: Customer Support and Replacement of Volker Beds

Dear Volker Bed Customer –

As a past customer of Hertz Supply, thank you for your inquiry. ProCare Medical Company is a provider of healthcare solutions focused on safety and point of care equipment, and last year Hertz Supply transitioned their healthcare business to ProCare Medical Company.

For over 10 years, Hertz Supply had imported the Volker bed. When Hill-Rom purchased Volker in 2012, and after the 2 year transition period occurred through 2014, Jeff Hertz decided to retire from the business.

As you may know, Volker Beds are primarily supported by Hill-Rom, **but ProCare Medical also has select parts, all replacement mattresses for Volker, and a premium replacement bed.** This replacement bed is Med-Mizer, a US based manufacturer with 5 models for healthcare or home settings. Whether you are replacing beds or expanding a building, the Med-Mizer beds are a good choice with unique logistic and innovative clinical features.

Here are several highlighted features of the Med-Mizer bed:

- A true low bed at 9" floor to frame height.
- 4 different assist or side rails options for any setting.
- Integrated controls into rails for lowest cost of ownership in the industry.
- RetractaBed feature for fall prevention.
- And MORE

Want to learn more or schedule a demonstration at your facility? Contact your local representative today, or our office toll free at 855-528-0421.

ProCare Medical
