

INDIVIDUAL TABLE SOLUTIONS

FOR A MORE ACTIVE
QUALITY OF LIFE!

TRANSFORMING CARE, IMPROVING LIFE

TABLE TOP TILT

Tiltable table tops give the possibility to vary your sitting position.

Laptop work – Relaxed posture. (flat-top table)

Writing – Posture leaning forward using the middle of the table. (mid-tilt)

Reading – Relaxed posture using the top of the table and bringing it close to you. (full-tilt)

TABLE HEIGHT ADJUSTMENT

A height adjustable table makes it easy to adjust the table exactly to your height.

Adult

Person standing

FOR ALL PEOPLE, REGARDLESS OF MOBILITY

A table is a gathering place in life where we talk, eat, work, play and laugh. It is for all age groups, for walking-impaired, for wheelchair users, for visually-impaired and any other person - disabled or not.

Our tables are created for the moments in life that we share with others, regardless of mobility. That is why you will find our tables in private homes, schools, nursing homes, rehabilitation centers and hospitals, and it is the reason our products are preferred by the users, their families, caregivers and therapists.

ABOUT ROPOX

FREEDOM AND CONFIDENCE TO BE INDEPENDENT

“People with disabilities deserve an easier life with more self-esteem, quality of life and freedom to safely look after themselves.” This philosophy has been our goal since we set up our business back in 1962. Today, our more than 60 employees continue to pursue this mission.

With more than 50 years of experience, we are amongst the world’s leading specialists and producers of assistive devices and furniture for people with disabilities as well as equipment for ergo- and physiotherapy and for rehabilitation. Being part of the AddLife group, we also have access to a large and strong network of partners who specialize in developing services and products to both private and public healthcare sectors.

Ropox is provided to North American markets by ProCare Innovations.
