

”Easy access to the shelves
– regardless your height”

VERTIINSIDE

YOUR KITCHEN CABINET WILL REACH NEW HEIGHTS

Electrical height adjustable shelves enable the user to easily reach items in the cabinets.

Ideal for children, short people and wheelchair users. The system is especially ideal for wheelchair users as you can reach the 2 lower shelves without having to open the cabinet doors first.

The VertiInside upper cabinet system looks just like any other common kitchen cabinet system in general and you adjust the shelves by a control panel for example integrated in the fascia.

VERTIINSIDE

Tips:

- We recommend double doors for cabinets with from 60 cm to prevent the users from stepping back when opening the doors.
- Along with the product you also get 2 integrated safety stops one for the top and one for the bottom.

The items are produced according to the following Directives and Standards: DS / ISO 17966:2016
